HEURES D'ENSEIGNEMENT

Anglais : communication scientifique	Cours Magistral	6h
--------------------------------------	-----------------	----

Présentation

DESCRIPTION

This hands-on course is intended for students who need guidance when preparing and giving presentations as non-native speakers of English. The course combines three approaches: Getting organized

#Learn how to select and organize the content of an oral presentation, create powerful slides, deliver the presentation effectively, and answer questions usefully, Improving English skills

#Learn how to expand specific vocabulary, revise slides, improve the clarity, conciseness, and effectiveness of English, and enhance pace, elocution, and intonation, Improving public speaking skills

#Learn how to tell a story, explain scientific concepts to a less specialized audience, and handle stage fright and mishaps.

The tutorials offer students the opportunity to give presentations as well as give and receive productive peer and teacher feedback.
