

Climate Change and Health

Niveau d'étude : All levels # ECTS crédits # Période de l'année : Anytime

En bref

Langue(s) d'enseignement: English
Méthode d'enseignement: Online

* **Institute / faculty:** . Mooc on Iversity
* **Duration (weeks) :** 6

PRÉ-REQUIS NÉCESSAIRES

Prerequisites

The course does not require any knowledge about the climate system and climate change.

CONTRÔLE DES CONNAISSANCES

Assessment methods (exams), prerequisites for exams

No exam

En bref

CONTACTS

Name of the lecturer

Prof. Dr. Med. Rainer Sauerborn

Présentation

DESCRIPTION

Short Description

With this MOOC, we want to provide state-of-the art evidence of the link between climate change and the health of populations

Long description

Climate change is currently at the center of the world's attention, with delegations from more than 190 countries meeting in Paris for the COP21 to negotiate an agreement how to reduce greenhouse gas emissions to keep global warming under 2°C. There are not many world citizens who do not have their children's and their own health as a top priority. So why is health not more prominent topic in the debate on climate change and its impacts? We hear a lot about polar bears and smokestacks in the media, but very little on the many and the large health impacts of climate change. With this MOOC, we want to provide state-of-the-art evidence of the link between climate change and the health of populations.
