

Phonological Analysis

Niveau d'étude
Master 1

ECTS
3 crédits

Composante
UFR
Linguistique

Volume horaire
30h

Période de
l'année
Semestre 2

En bref

- **Langue(s) d'enseignement:** Anglais
- **Forme d'enseignement :** Cours magistral & Travaux dirigés
- **Ouvert aux étudiants en échange:** Oui

On successful completion of this course, students should be able to:

- * Describe and analyse a set of phonological data under different theoretical models;
- * Understand the implications of the proposed analysis for phonological cognition;
- * Learn to critically evaluate the proposed solutions in the context of the models used.

Présentation

DESCRIPTION

This course studies phonological representations in the theoretical model of **Autosegmental phonology**.

We begin by studying phonological processes at the suprasegmental level: *tone, the syllable, the mora, stress, the metrical foot*.

In the second part of the course we turn to autosegmental representations as applied to segments through the model of **Feature geometry**.

The final part of the course examines how Autosegmental phonology introduces the notion of constraint, opening the way to a new formal model, based on a system of phonological constraints: **Optimality theory**.

OBJECTIFS

HEURES D'ENSEIGNEMENT

Phonological Analysis	Cours Magistral	18h
Phonological Analysis	Travaux Dirigés	12h

PRÉ-REQUIS NÉCESSAIRES

An introduction to phonology is required
