

Master Sciences de la terre et des planètes, environnement (M2) parcours International Master in Solid Earth Sciences

SCIENCES, TECHNOLOGIE

Présentation

The International Master in Solid Earth Sciences aims to train high-level geoscientists, who will continue their study for a PhD either at IPGP or elsewhere, in an academic or industrial context. Students are awarded a ten-month scholarship and are encouraged to choose their courses and research internship among the wide variety of possibilities offered by IPGP researchers and their industrial partners, as per their wishes. This second year master program is entirely taught in English: it welcomes every year a dozen of students coming from all over the world, having a solid background in fundamental sciences.

OBJECTIFS

Invitation to cutting-edge geosciences in IPGP, open to international students

Programme

ORGANISATION

M2 common with all the available courses in IPGP M2 including field trips

STAGES

Et après

INSERTION PROFESSIONNELLE

PhD students in IPGP, distinguished universities in France and worldwide, or in industry, interns in industry

- Researcher, Professor in academia and in industry

- R&D engineer in industry
- Project manager, consultant in various companies

En bref

Composante(s) de la formation

UFR Sciences de la Terre, de l'Environnement et des Planètes

Niveau d'études visé

BAC +5

Modalité(s) de formation

- Formation initiale

Lieu(x) des enseignements

IPGP
